AXEL PAUWELS

Senior Angular Front-End Developer

PROFILE

Senior front-end developer with 8 years of experience building enterprise web applications, of which 5 years fully dedicated to Angular. I design and evolve business-critical applications with a strong focus on maintainable architecture, clean code and long-term scalability. Pragmatic, quality-driven and a natural team player in Agile teams. I actively use modern practices and AI-assisted tooling to deliver faster without compromising on quality.

CORE COMPETENCES

Angular enterprise development
Large-scale applications supporting complex business processes.

Front-end architecture
Nx monorepos, reusable libraries and scalable state with RxJS & Signals.

Clean, maintainable code
Clear standards, reusable design and code that lasts.

Collaboration
Knowledge sharing and continuous improvement in multidisciplinary teams.

Modern & AI-assisted development
GitHub Copilot and Cursor to speed up delivery and raise quality. Currently learning spec-driven development.

EXPERIENCE

Senior Angular Developer
01/2022 – 10/2026

Sopra Steria > Ravago · Warehouse Management System

- Design, build and evolve the WMS: a business-critical application covering stock, production and order handling – desktop for office staff, mobile for warehouse operators with scanners.
- Drive the evolution of the front-end platform on Angular, Nx monorepos, GraphQL/Apollo and Kendo UI, improving maintainability, scalability and developer productivity.
- Simplify complex workflows and automate repetitive tasks; introduced and promote effective use of AI-assisted development in the team.
